

# Pacific white-sided dolphin

*Lagenorhynchus obliquidens*

## Fast Facts

1. They can travel in groups of 10 to 100 animals, although some groups might have 2,000 dolphins or more!
2. These dolphins can make whistling, clicking, chirping and tooting sounds with the blowholes (breathing holes) on the top of their heads. Can you make dolphin sounds?
3. They eat different types of food or prey, including salmon and squid. What kind of seafood do you like?
