Steller sea lion

Eumetopias jubatus

FAST FACTS
1. Steller sea lions at the Vancouver Aquarium have been helping us to learn more about why Steller sea lions have been disappearing from the ocean. Aquarium sea lions help scientists learn more about how much food sea lions eat, how much energy sea lions use, and what impacts their diet has on them.
2. Male Steller sea lions are 3-5 times the size of females. Why do you think they are so much bigger?
3. A baby Steller sea lion is called a pup. Pups need at least one year of care from their mother to grow big and strong. What do you think their mother does to help them grow up?
