Green sea turtle
Chelonia mydas

Fast Facts
1. Sea turtles swim underwater but go to the surface to breathe air – just like you!
2. There are seven different types (species) of sea turtle, and they all eat different things. Jellyfishes, sponges, sea grasses, shrimps, clams and crabs are some common sea turtle foods – do you eat any of the same things?
3. The green sea turtle at the Vancouver Aquarium is named Schoona. She was lost in British Columbia when she should have been swimming in much warmer water. Why do you think she got lost?
