Arctic cod
Arctogadus glacialis

Fast Facts
1. Life is not easy in the cold waters of the Arctic, but these fish can live in the ice without freezing! Imagine you are surrounded by ice right now – what would you do to stay warm?
2. Arctic cod eat plankton, which are tiny animals and plants that grow on Arctic ice. What kinds of things do you eat?
3. Narwhals eat Arctic cod. What other Arctic animals do you think eat this fish?
